

Java Developer

English: Proficient

Type: Hybrid

Range: Max 33M Gross

Job Summary:

We are looking for a skilled and motivated **Mid-Level Java Developer** to join our development team. You will be responsible for designing, developing, and maintaining high-performance, scalable applications. The ideal candidate should have strong Java experience, good problem-solving skills, and a passion for clean, maintainable code.

Key Responsibilities:

- Develop, test, and maintain backend Java applications.
- Participate in full software development lifecycle including design, implementation, testing, deployment, and maintenance.
- Collaborate with frontend developers, DevOps, and QA teams to deliver high-quality software.
- Write clean, efficient, and well-documented code.
- Optimize application performance and troubleshoot production issues.
- Contribute to technical discussions and solution architecture.

Technical Requirements:

- 2–3 years of experience in Java development.
- Strong knowledge of **Java SE / Java EE / Spring Framework (Spring Boot, Spring MVC, etc.)**
- Experience with **RESTful APIs, Microservices, and API integration**.
- Familiarity with **ORM tools** such as Hibernate or JPA.
- Good understanding of **Docker** and/or **Podman** for containerized applications.
- Experience with build tools like **Maven** or **Gradle**.
- Familiarity with **Git** and version control workflows.
- Experience with **database systems** like MySQL, PostgreSQL, or MongoDB.

Nice to Have:

- Knowledge of **message brokers** (e.g., RabbitMQ, Kafka).
- Experience with **CI/CD pipelines** (e.g., Jenkins, GitLab CI).
- Exposure to **cloud platforms** (AWS, GCP, Azure).
- Frontend experience (e.g., Angular, React) is a plus.
